

Unweighting Benefits

Unweighting adds a new dimension to providing **SAFE** care for your clients and staff. From acute, chronic back pain to cutting edge performance enhancement, unweighting is a key component in functional rehab.

- Exercise without fear of falling
- Buoyancy without water
- Partial weight-bearing
- Improves balance and posture
- Early gait analysis and correction
- Early ambulation
- 360° rotation

"I can't open my new clinic without the **Pneumex Unweighting** system. It's one of the few capital purchases that is essential to my practice."
Dr. Bill O'Grady, DPT, MA

* Lift per station

All unweighting units may be eligible for Section 44 tax credits

"The PneuWeight system has given me that specialized edge I was looking for with all of my rehab., fitness and performance enhancement clients. Given a choice, I wouldn't do it any other way."

Pedro Iniguez, MSPT, Cert MDT, Cert IWA

"The PneuWeight system is the most versatile equipment I have. I use it on almost all of my patients including AKA, pre/post prosthetic training, balance/gait challenges. It allows patients to perform activities without compensational strategies, stimulating a more normal movement."

Johnny Galver MPT
