

# PneuWeight™

UNWEIGHTING SYSTEM

The PneuWeight Unweighting System allows patients to perform therapeutic activities in an upright, functional position without altering gait patterns in a safe and secure environment for both client and practitioner.

## A TRULY FLEXIBLE SYSTEM

- Unique cantilevered design for unobstructed access.
- The largest range of unweighting in the industry: **0 to 300 lbs.**
- 30" vertical oscillation — offering Balance and Exercise modes, as well as a drop-stop.
- 360 degree rotation allows multi-planar exercise.
- Patented vest with adjustability for posture and gait.
- Adjustable height range from 7'11" to 8'8".
- Sturdy and simple to use control panel.
- Customized pricing available.
- Available in single and double stations.
- Available with Analog control panel.

## Key Benefits

- ◆ Abilities patients
- ◆ Bariatric patients
- ◆ Orthopedic patients
- ◆ Strokes
- ◆ Back problems
- ◆ Gait training
- ◆ Cardiovascular
- ◆ Respiratory ailments
- ◆ Neurological patients
- ◆ Safety

### Analog Control Panel

Easy to read, easy to use analog control allows precise unweighting from 0 to 300 lbs. in 1 lb. increments. Features balance and exercise modes in familiar dial format.

All PneuWeight systems require a compressor to operate.

Patent 6672998

The system can be used over most exercise equipment, including but not limited to: treadmills, vibration platforms and balance equipment.

"I can't open my new clinic without the PneuWeight Unweighting System. It is one of the few capital purchases that I think is essential to my practice."

Dr. Bill O'Grady, DPT, MA, OCS,  
FAAOMPT, FAAPMa

"The PneuWeight system is the most effective program for dealing with treatment of back pain and prevention of injury. The results are consistent and reproducible between clinics."

Steve Sodorff, PT
